LITTLE RIVER CASINO IMPLEMENTS SCI'S FOOD-TRAK® FOOD AND BEVERAGE MANAGEMENT SYSTEM

Scottsdale, AZ – July 8, 2008 – System Concepts, Inc. is proud to announce the addition of another Indian Gaming client who will get relief from rising food costs through improved F&B controls. Little River Casino in Manistee, Michigan is among several new clients who are now implementing SCI's FOOD-TRAK® F&B Management System.

“Doing a physical food and beverage inventory for us just wasn't working out. It was fluctuating too much. We were looking for a system that would provide us an accurate account of our inventory and purchases and flag any variances,” explains Jason Cross, Senior Food and Beverage Manager at Little River Casino. “Also, our Finance Department wanted an interface to our accounting software. Other systems we checked out didn't do that until we found FOOD-TRAK®. Now we get accurate information when we need it and the structure to build on. I wish I'd had this system 10 years ago”.

The over 23,000 square-foot Little River Casino is located in northwestern Michigan and includes a 292-room luxury hotel, 1700-seat event center, multiple eateries and bars. Their casino boasts over 1350 slots in addition to the 28 table games.
