System Concepts, Inc. Announces

New Advanced Procurement Module for FOOD-TRAK® System

Industry's leading food and beverage inventory & procurement solution now offers automated vendor bidding and other advanced procurement features for maximum food and labor cost savings

SCOTTSDALE, Ariz.--([BUSINESS WIRE](#))--System Concepts, Inc. (SCI), an industry leader in food and beverage inventory and procurement software, announced the release of its Advanced Procurement Module for its web-based FOOD-TRAK System.

The new Advanced Procurement Module was specifically designed to handle the complex procurement needs of large-scale food and beverage operations. Organizations with multiple outlets, central storage and centralized purchasing can now utilize the industry's most advanced F&B procurement capabilities. Streamlining the process from sourcing to distribution, the Advanced Procurement module offers requisition tracking, warehouse control, cross-docking, vendor bidding, automated purchase order generation, vendor performance and rebate tracking to dramatically reduce labor costs.

"We have many clients with complex environments like hotels, resorts, convention centers, casinos, clubs and culinary schools that need highly specialized automated food and beverage procurement features"

"We have many clients with complex environments like hotels, resorts, convention centers, casinos, clubs and culinary schools that need highly specialized automated food and beverage procurement features," said SCI Founder and CEO Bill Schwartz, CHTP. "These new tools, in addition to our core system's food cost control capabilities, will enable our clients to meet their sophisticated procurement needs and gain a competitive edge in the marketplace."

The Advanced Procurement Module is available with the newly released FOOD-TRAK version 4.2, and is available immediately. Other recent technology developments include the FOOD-TRAK Mobile Partner for paperless inventory, requisitions, shopping lists, receiving and transfers. SCI also introduced iPad capabilities for warehouse pick lists.
